

Saurabh Jha

Technical Product Owner | Senior Manager

Professional Summary

Strategic Technical Product Owner expert in transforming complex digital ecosystems into high-revenue engines. I command the holistic product lifecycle—steering ₹10+ Crore budgets, orchestrating vast API integrations, and leveraging generative AI to build highly secure, performant, and profitable platforms.

Experience

Technical Product Owner | Senior Manager

Sep 2023 - Present

Bangalore International Airport Ltd (BIAL)

 Bengaluru

- **Revenue & Financial Command:** Manage a product budget exceeding ₹10+ Crores (OPEX/CAPEX). Successfully scaled platform revenues from ₹2-3 Cr (FY23-24) to ₹36 Cr (FY25-26), overcoming the unique adoption challenges of airport e-commerce to deliver unprecedented ROI.
- **Technical Integrations & Product Ownership:** Serve as the definitive face of product development, bridging vendors, UX, and engineering. I architected complex multi-partner API and webhook integrations to launch high-impact features: Cabs, Flight & Transit Hotel bookings, Lounge pre-booking, 9 distinct Airport Services ("Care by BLR"), Rewards programs, and seamless DigiYatra boarding pass uploads via complex data payload parsing.
- **Cross-Functional Leadership:** Bridge the gap between engineering and business. I collaborate with terminal operations to maximize feature visibility, partner with Marketing on high-conversion campaigns, and interface directly with Legal to establish robust Terms & Conditions.
- **Advanced Cybersecurity:** Act as the uncompromising guardian of platform resilience. I lead proactive application hardening—conducting API vulnerability assessments, verifying cipher strength, implementing rigorous header checks, and ensuring SSL pinning.
- **AI & Cloud Governance:** Direct a modern AWS EKS ecosystem (React.js, Node.js). I utilize Prometheus/Grafana for monitoring and integrate generative AI (Claude/Antigravity) to enforce stringent code reviews and elevate executive technical presentations.

CORE EXPERTISE

- Product Strategy
- React & Node.js
- Cloud Environments (AWS & Azure)
- API Architecture
- Event-Driven Auth
- Claude / Antigravity
- Headless CMS (Strapi)
- Cybersecurity
- Budgeting & Financial Planning
- SAP Procurement
- Vendor Management
- Performance Marketing
- SEO
- Stakeholder Management

EDUCATION

Executive MBA

Product Management
Institute of Product Leadership

Bachelor's Degree

Physical Sciences
Osmania University • 2003 - 2006

Lead Business Analyst / Scrum Master

May 2020 - Oct 2023

Unisys

Bengaluru

- Strategic Agile Leadership:** Led Scrum rituals and product backlog management for high-complexity Data Engineering and Machine Learning initiatives.
- Data & Cloud Governance:** Directed Azure Kubernetes Service (AKS) clusters and engineered end-to-end data pipelines via Azure Data Factory (ADF).
- Engineering Oversight:** Managed Bitbucket repositories, provided technical leadership through Python and SQL code reviews, and optimized CI/CD pipelines via Jenkins.
- Architecture & AIOps (30% Efficiency Gain):** Partnered with Data Scientists to architect AIOps solutions, specifically building 'Auto-Fix APIs' for incident management systems. This significantly enhanced the automated resolution capabilities of our ticketing tools, reducing manual intervention by 30%.

Earlier Professional Experience (2006 - 2020)

- VMware Software India Ltd (2014-2020) - Business System Analyst:** Implemented SaaS products on subscription delivery platforms (Aria, Oracle EBS) via Scrum delivery, managing Drupal CMS and system interfaces.
- Cognizant (2012-2014) - ERP Consultant:** Led SAP-IS retail and MM consulting for Singapore Duty Free & Loblaw Inc., driving new functionality rollouts after gap analysis, data migration, and UAT.
- HCL Technologies & Infosys (2006-2012) - Senior QA/Test Engineer:** Acted as SAP QA lead for supply chain modules, executing manual and automated scripts (ALM, QTP).
